West Palm Beach, Florida 33409*

Dear Sir,

Please extend to all your employees who work on the pipelining project at Costa Crest Condominium our sincere thanks and appreciation for a great job performance.

Since February 2015, The Board of Directors at Costa Crest Condominium worked with P.T.I. on the pipelining project. After eleven (11) months of research and nine (9) meetings with plumbers, contractors and unit owners. The Costa Crest Condominium unit owners opted for P.T.I. to do the project.

Mr. William Pedersen, Operation Manager, of P.T.I. was more than professional and showed the unit owners a 2 hour state of art video inspection of our pipe lines at a meeting.

The Board would like to thank Patty and Page in the office for all their help and providing detailed information to Holly Hunsberger.

The supervisor Christian and all the crew were also very professional and kept the Board informed. This helped the Board to communicate with the residents.

Best regards,

*Holly Hunsberger
Costa Crest Condominium President*
